Property Transfer Well and Pressure System Inspection

Form 3300-221 (R 08/21)

Notice: Pursuant to ch. 280, Wis. Stats., and ch. NR 812, Wis. Adm. Code, this form shall be used to document any well and pressure system inspection conducted as part of a property transfer. Inspections are voluntary, and well owners are not required to bring systems into compliance as a result of the inspection. Inspectors must provide the completed form to the requester of the inspection. Do not send forms to DNR.

Casing less than 6" in diameter for a well terminating in limestone, dolomite, shale, quartz or granite 25. Extreme Health/Safety Hazard 							
Compliance Dete	rmination							
 Based on my personal inspection of the real property, the well and pressure system: (check one) Complies with NR 812, Wis. Adm. Code Does not Comply with NR 812, Wis. Adm. Code Complies with NR 812, Wis. Adm. Code, except that a more comprehensive search or additional research is needed to evaluate potential violations that may exist but are not fully identifiable as part of the basic visual inspection, such as: an unused well floodway/floodplain contamination source 								
This form lists the visible conditions of the well and pressure system on the property at the time of inspection and does not imply or give any guarantee. Some features such as well cap, casing height or nonpressure conduit may comply for purposes of this inspection, but may require an upgrade the next time work is done on the well or pressure system.
